OBJECTIVE

Recent Computer and Data Science graduate with diverse experience spanning software engineering, solution architecture, data analysis, marketing, project management, and creative content development. Known for bridging technical and business perspectives to design scalable solutions, optimize operations, and drive organizational growth. Passionate about leveraging technology, data, and innovation to create meaningful impact across industries.

EDUCATION

Bachelor of Computer and Data Science — Alexandria University Jun 2026 CGPA: 3.8236

Digital Egypt Pioneers Initiative (DEPI) — Ministry of Communications and Information Technology 2024
Completed specialized training in **React.js** development with a focus on responsive web applications, front-end architecture, and modern development practices.

SKILLS

Languages & Web	Python, SQL, TypeScript, JavaScript, HTML5, CSS3, C++
Frameworks & Libraries	T3 Stack, Next.js, React.js, Node.js, Tailwind CSS, tRPC, WordPress
Databases & Cloud	PostgreSQL, MySQL, Supabase, Firebase, REST APIs
Data & Automation	n8n, Workflow Automation, Power BI, Pandas, NumPy, Advanced Excel
Developer Tools	Git, GitHub, VS Code, Docker, Postman
Creative Tools	Adobe Photoshop, Adobe Premiere Pro, Canva
Soft Skills	Leadership, Project Management, Public Speaking, Negotiation, Adaptability, Problem Solving

WORK EXPERIENCE

Solution Engineer — SCOPES Health (Remote, California, USA) Sep 2025 – Present

Designed and implemented internal software solutions supporting healthcare operations across SCOPES Health, APMS, and University Surgical Institute.

Architected and developed custom platforms using the **T3 Stack** (Next.js, TypeScript, Tailwind CSS, tRPC) to centralize workflows, case management, and operational processes.

Built and maintained automation systems using **n8n**, reducing manual administrative workloads and accelerating business processes from days to minutes.

Developed custom billing, reporting, and data management tools that significantly improved operational efficiency and revenue cycle workflows.

Collaborated directly with executives, medical providers, and administrative teams to identify bottlenecks and deliver scalable technical solutions.

Provided technical support, system integrations, and process optimization initiatives across multiple healthcare entities.

Solution Engineer — Gramercy Center (Remote, USA) Sep 2025 – Present

Designed and implemented software solutions to improve organizational efficiency and support business growth initiatives.

Collaborated closely with the marketing team to enhance and maintain the company's **WordPress** website, improving functionality, performance, content management workflows, and user experience.

Developed automation workflows and internal tools to streamline administrative and operational processes.

Worked cross-functionally with stakeholders to gather requirements, analyze business needs, and deliver scalable technical solutions.

Provided ongoing technical support, process improvements, and system optimization to ensure smooth day-to-day operations.

Technical Project Manager (Collaboration with Apple California) — People of Data 2024

Led a collaborative data-driven project while managing technical teams and project timelines using Agile methodologies.

Coordinated communication among international stakeholders and trained more than 10 moderators to ensure consistent project execution and delivery.

Technical Team Lead — Sputnik (Startup) Oct 2024 – Oct 2025

Leading the development of the company’s platform using React.js and modern web technologies.

Collaborating with designers and stakeholders to deliver a scalable e-commerce and learning management platform.

Managing development workflows, technical decisions, and project execution.

Data Analysis Intern — Creativa Innovation Hubs Oct 2024 – Jan 2025

Analyzed student and organizational performance data using statistical and visualization tools.

Produced reports and recommendations that contributed to measurable operational improvements.

Programming Instructor — PES Academy Sep 2023 – Sep 2024

Teaching programming fundamentals, algorithms, problem-solving, HTML, CSS, JavaScript, and web development concepts to beginner-level students.

IT & Data Analyst Intern — Edita Food Industries Feb 2025 – Mar 2025

Managed user access controls, system administration tasks, and cloud-based tools.

Performed internal data analysis to improve supply chain visibility and operational workflows.

EXTRA-CURRICULAR ACTIVITIES

- Secured **4th Place** in the PepsiCo Arab Youth Hackathon, competing against more than 100 teams. 2024
- **Project Management Head** — Enactus Alexandria 2022 – 2023 Leading multiple student-led entrepreneurial projects impacting more than 200 beneficiaries annually.
- **Public Relations Member** — OVD 2023 – 2024 Managed external communications and stakeholder engagement initiatives.
- **IT Member** — HackerRank 2022 – 2023 Provided technical support for coding competitions and technology community events.
- **PR Team Leader** — Techne Summit 2024 – 2025 Led public relations activities, coordinated communications, and managed stakeholder engagement for one of the region’s largest technology conferences.
